

Adani Stock Data Analysis Dashboard

This project presents a stock market dashboard focused on Adani stock data. The dashboard helps to understand stock trends, price movement, and trading patterns in a simple and visual way.

Problem Statement:

Stock market data is complex and difficult to understand in raw format. This project solves the problem by converting raw stock data into clear charts and insights.

Key Features:

- Daily stock trend analysis
- Monthly and quarterly performance
- Volume analysis by month
- 52 week high and low comparison
- Filters for day, month, and year
